DETAILED ACTION

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: References by Anderson et al. (U.S. PGPUB 20020196250), Marks et al. (U.S. Patent No. 6,741,245), Mukouchi et al. (U.S. Patent No. 6,104,403), and Aish (U.S. Patent No. 4,275,449) teach related methods of generating a computer readable model from a plurality of interconnectable construction elements. However, none of the cited prior art teaches or suggests retrieving connectivity information of the corresponding connection types of the first and second connection elements indicative of whether the first and second connection elements provide a connection between the first and the second construction element.
